

Variations In The Quality Of 8th Grade Students Across The Districts Of Bihar And Kerala

ANANYA ISHANI

Abstract

This study presents a detailed comparative study of the best and worst performing states on the front of literacy, Bihar and Kerala. It uses the NAS, 2017 (National Assessment Survey) data to compare the states on district level. The variation is also measured in categories such as, gender, caste, area (urban or rural). It is found that the students of both states show similar learning outcomes, however, the average scores for both states is less than 50%.

Keywords: Quality of Education, District wise comparison, Gender wise comparison, Caste wise comparison, Area wise comparison, Bihar, Kerala.
